Election/Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-64, drawn to a user interface for inserting a custom algorithm in a data mining application, classified in class 707, subclass 6.
- II. Claims 65-84 drawn to a method of providing a ground truth tool in a database, classified in class 717, subclass 137.
- III. Claims 85-118, drawn to a method for seamless insertion of custom algorithms using tap points, classified in class 709, subclass 217.

Inventions I and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because invention I is not concerned about where the algorithm is inserted. The subcombination has separate utility such as determining tap points in a media stream.

The combination of inventions I and III and invention II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as the accuracy analysis of content. See MPEP § 806.05(d).

Art Unit: 2161

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Mr. Philip Segrest on November 1, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.
